Gas detector **DEGA NS III LCD RE**

DEGA NS III LCD RE detector is a part of the gas detection system. Detector is located in monitored premises in which critical situations due to accumulation of flammable or toxic substances can occur. Detector converts the measured concentration of substances into a unified signal 4 - 20mA and RS485. Detector has an LCD display to show measured concentrations of detected substances in real time; and it is equipped with 4 relays.

The detector can be connected to control panels DEGA UPA III, DEGA UKA III and DEGA UDA III.
